

SWS Marina

2018 – 2019 Storage Rates

Phone: (705) 765-0424

Email: service@summerwatersports.com

SWS Marina offers a variety of services to take care of your boats during the off season. Boathouse storage at your property, shrink wrap on our property, indoor non-heated or controlled indoor storage at our service facility are all available. Give us a call and we can walk you through our services and options to ensure your boat is ready for next season.

WINTERIZE INCLUDES Draining the engine and bilge of water, stabilizing the fuel system, filling with non-tox antifreeze when necessary, hull wash and battery disconnect.

****New mandatory service-** we will perform the below items upon winterization to ensure no moisture is present internally over the winter, this is for the safety of your boat over the winter. ******

Stern Drives & outboards (40hp+) – oil change \$165.00 and gear lube change \$115.99

V-Drives & Tow Boats – oil change \$185.00 (5.7L) \$225.00(7.4L), transmission fluid/v-driver fluid change \$115.99

****If oil or gear lube changes cannot be completed in your boathouse due to cold weather, environmental safety, or tech safety, your boat will be brought to the marina for the service and returned. There will be an additional service call fee (starting at \$35 depending on distance) for this to be done.****

SUMMERIZE KIT INCLUDES: Reconnect and test battery, drain non-tox antifreeze, basic wipe down and perform a 30 point inspection and water test.

Our Policy:

Regular Service Items including: Propeller Damage, Batteries, Water Pumps, Bilge, Horn, Navigation Lights, Blower, Impeller, and any items required to make the boat safe, work properly and legal, will be noted and repaired and billed to the customer without a prior quote.

Note: All prices subject to change, and there may be additional costs depending on the specific make and model of boat. Any price adjustments beyond the above will be confirmed at time of storage booking. Water pump impellers on tow boats should be done annually and on stern drives and outboards every 2-3 years or as needed.
